- Important reduction in gross NPEs from 15.1% in Dec'15 to 13% in Dec '17
- To be further reduced to lower than 10% in 2019/2010 thanks to the sale of an important amount of NPEs following IFRS9 FTA
- Cost of credit in FY17 at 79 bps notwithstanding the inspection underway by the ECB
- Confirmed by evidences collected by the bank, the accuracy of credit classification

* Calculated as gross value of badwill allocated to NPEs equal to 565.5 mln/€, net of 64 mln/€ referred to PPA reversal

CET1 ratio: 11.43% fully loaded at year end. Total IFRS9 FTA impact fully loaded at -12 bps

**PROPOSED
DIVIDEND:
11 cent/€**

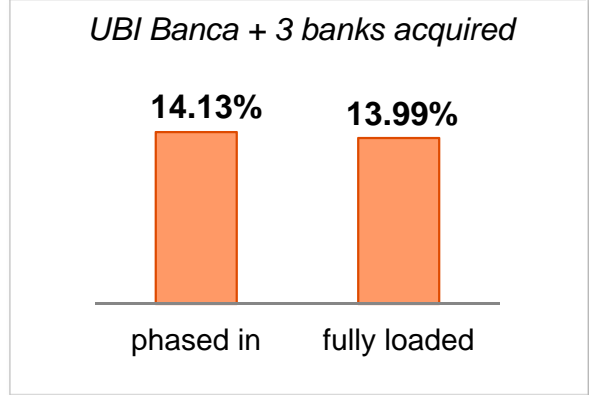

CET 1 key Δ Dec '17 vs Sept '17:

- 27 bps update of credit risk parameters (historical series) included in internal models
- 7 bps investments in UCITS*
- +23 bps synthetic securitization

IFRS 9 preliminary indications:

- sale of a substantial package of non-performing loans over the next 3 years was decided in order to accelerate the achievement of a gross non-performing loan ratio of less than 10% between 2019 and 2020, depending on market conditions
- fully loaded impact of First Time Adoption of IFRS 9 is expected, inclusive of all the components envisaged, to total approximately **-12 bps** on the CET1 (FTA impact absorbed by Model Change also extended to 3 Banks)
- transitional provisions allow the phase-in of IFRS9 over 5 years, thereby rendering the impact of FTA lower than **-1 basis** point for 2018

TOTAL CAPITAL as at 31st Dec '17

* Undertakings for Collective Investment in Transferable Securities
SREP requirements: 7.5% for 2017 and 8.625% for 2018

Business Outlook on ordinary operations

The trend for operating income is one of growth compared with 2017, as a result of the effect of the following main components:

- growth in **net interest income** as a result, amongst other things, of a further reduction in the cost of funding;
- a **further growing contribution from fees and commissions** both with regard to asset management business and general banking business with customers.

The path taken to optimise **operating expenses will continue as a result in particular of the benefits related to incentive schemes** and the complete integration of the new banks also following the IT migration.

Credit risk should remain particularly low in the performing portfolio, inflows of new non-performing loans will reduce and the performance of credit recovery will improve, with a consequent **containment of loan losses**.

On the basis of these trends, the net normalised result for 2018 is expected to show important growth compared with the previous year.

The following is also envisaged during the course of 2018:

- with the migration of Banca Teatina by the end of February, the completion of the integration of the new banks on time and within the budgeted integration costs;
- the disposal of the first tranche of the portfolio of non-performing loans identified, within the context of the First Time Adoption of the new international standard IFRS 9 in force from 1st January 2018.
